

Super Cobra High Score Save Kit

Installation Instructions

Features

1. Saves High Score Table *
2. New Free Play Mode! **
3. Attract mode on during Coin / Free Play
4. Rom Saver

* To clear the high score table hold down Fire + Bomb while the game is booting up

** To enable free play mode use the 4 coins for 3 credits dip switch setting (Dip Switch 4 and 5 are off)

Step 1

Remove the PCB from the cabinet and remove the black box from the pcb. The ribbon cable and the power (red/black) cables need to be unplugged. The black box is no longer needed.

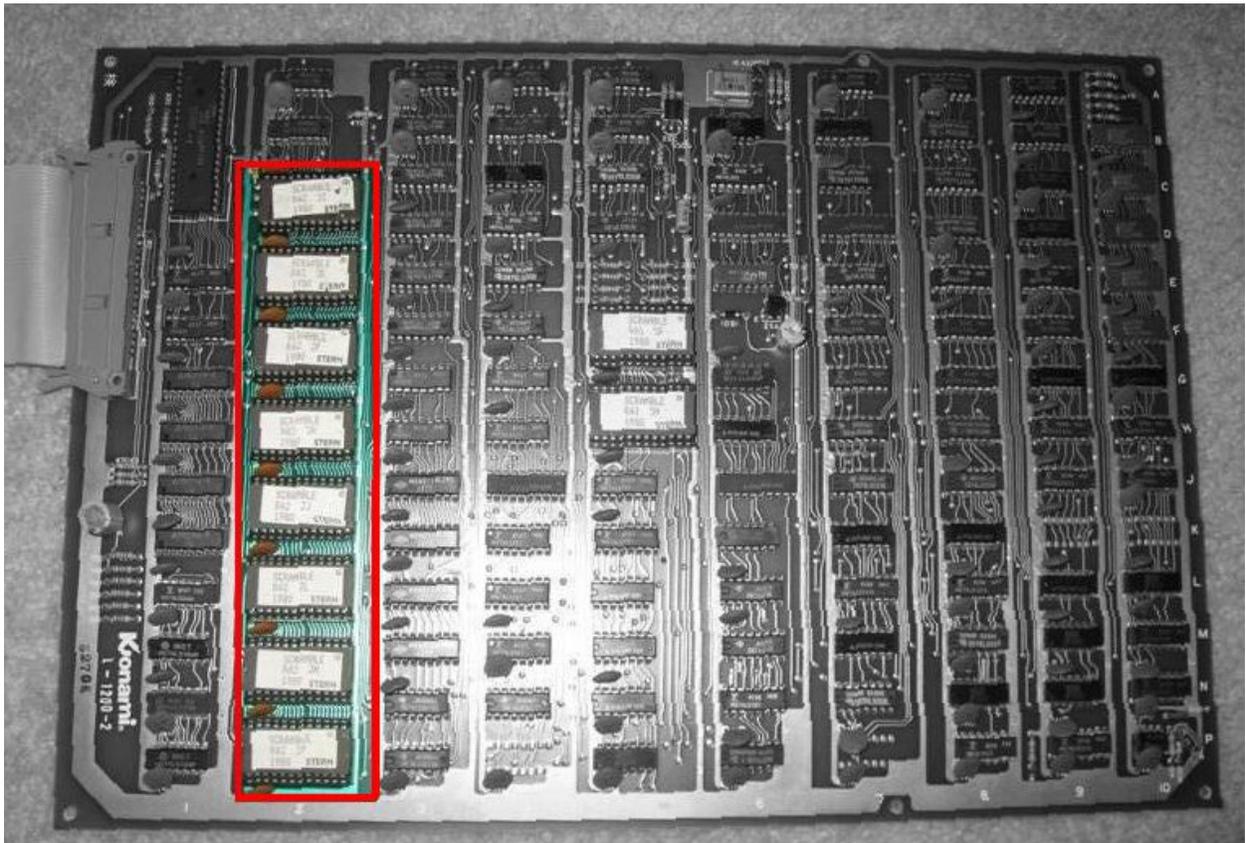

Step 2

Separate the two boards (pictures below are of a scramble board but they are more or less the same, z80 will not be present on the Super Cobra board)

Step 3

This next step is optional but highly recommended as the HSS board will fit better and the old eproms will not be sucking power from the board. If you choose to you can remove the following 6 eproms (scramble has 8).

Step 4

Place the z80 on to the HSS Kit. Make sure no pins get bent and the notch is facing the correct direction

Step 7

Attach the two boards back together and return back into the cabinet. You may need to change the spacers on the board if the original ones are not long enough to accommodate the HSS board.
