

Commando High Score Save Kit

Installation Instructions

Features

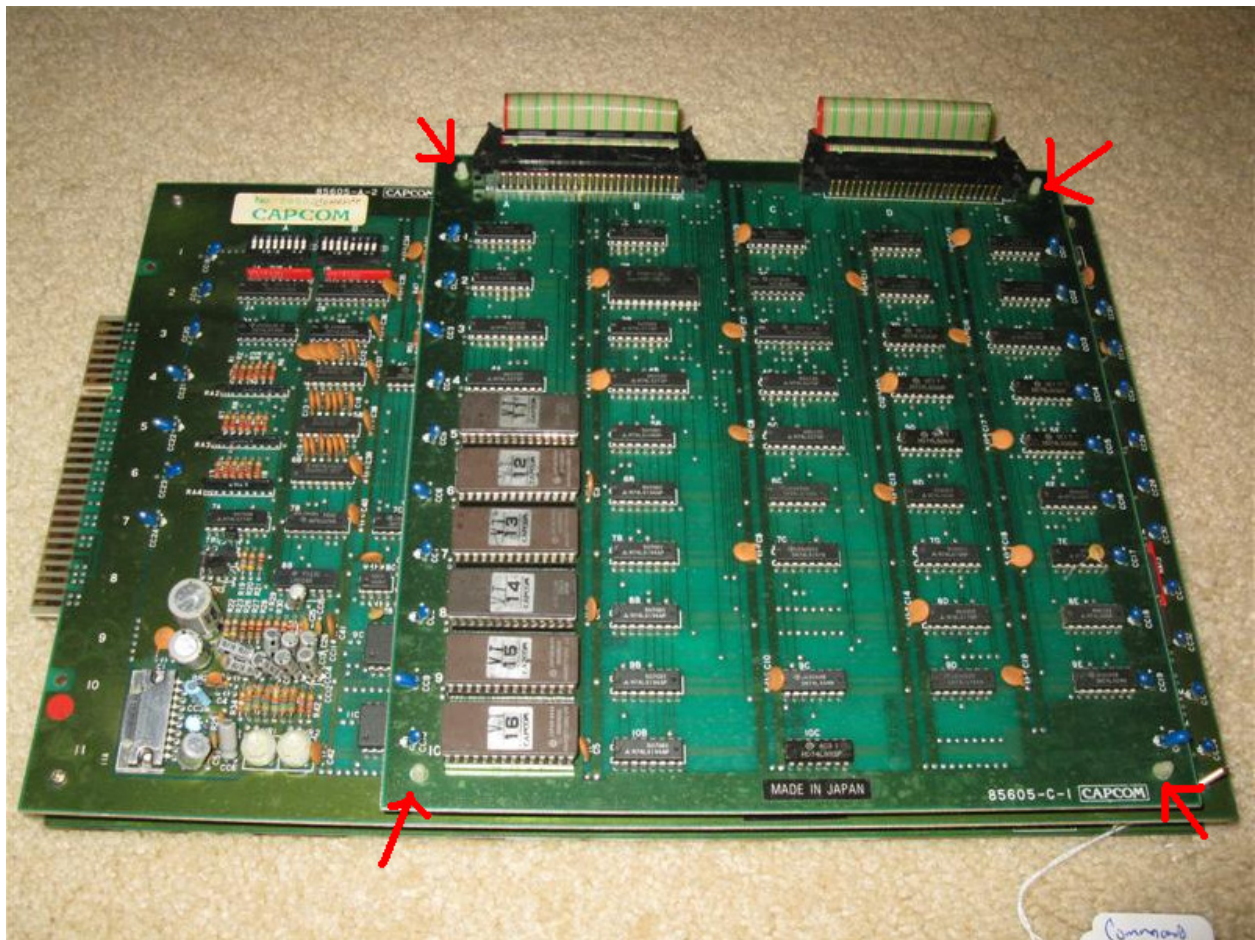

1. **Saves High Score Table ***
2. **New Free Play Mode ****

*** To clear the high score table hold down Player 1 + Player 2 start while the game is booting up. This is easily done by opening the coin door and holding the start buttons and then closing the coin door. Once the text starts typing you can let go**

**** To enable free play turn on dip #3 and #4 on dip switch A**

Step 1

Remove the PCB from the cabinet and pinch the pcb spacers so you can remove the top board

Step 2

Desolder the ram at 7M and install the socket included with the kit. **If you do not feel comfortable with this step please have someone do this for you, I am not responsible if you ruin your board.**

Socket in place

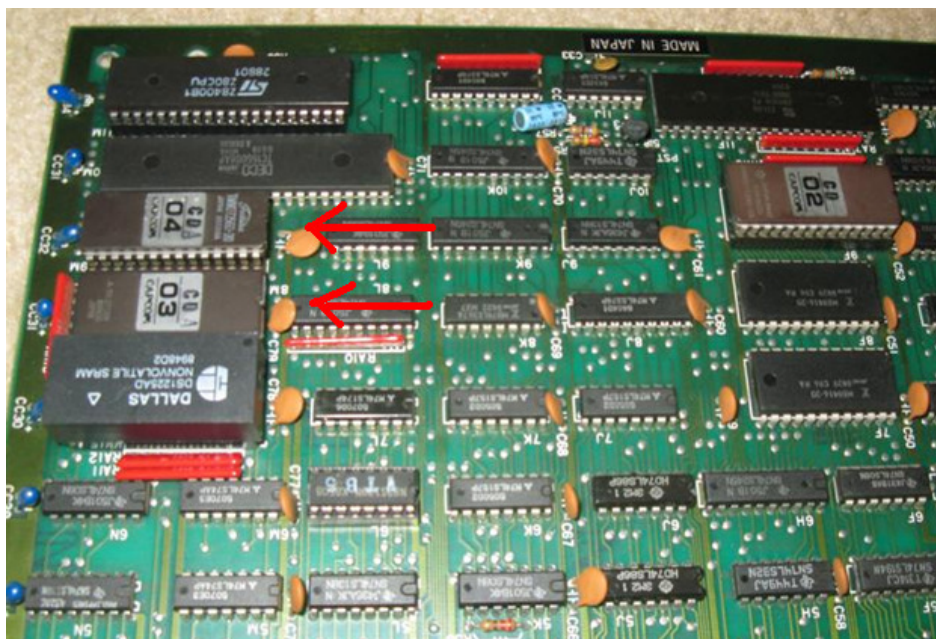

Step 3

Place the DS1225 nvram in the socket, please note the dot on the nvram indicating pin one.

Step 4

Remove the eproms at location 8M and 9M

Step 5

Insert the two eproms that came with the kit into these locations. Please use the notch on the eprom to ensure you are installing it the correct way.

Step 6

Put the top pcb back onto the stack and return your pcb to the game. Your installation is now complete.
